**CO<sub>2</sub> Reduction Targets Receive SBTi Approval**

Osaka, Japan – Daifuku Co., Ltd. is pleased to announce that the CO<sub>2</sub> emissions reduction targets established in the Daifuku Environmental Vision 2050 have been recognized as near-term science-based targets in accordance with the Paris Agreement and have received official approval from the Science Based Targets initiative (SBTi)\*1.

■CO<sub>2</sub> emission reduction targets established in the Daifuku Environmental Vision 2050 (targets for 2030)

KPIs (Key Performance Indicators)	Targets
Daifuku CO <sub>2</sub> emissions (Scopes 1+2)	50.4% reduction compared to FY2018 (1.5°C aligned)
CO <sub>2</sub> emissions from purchased goods and services (Scope 3 Category 1)	30% reduction*2 compared to FY2018 (well-below 2°C aligned)
CO <sub>2</sub> emissions from the use of sold products (Scope 3 Category 11)	

In the Daifuku Environmental Vision 2050 (revised in May 2023), we have established addressing climate change as one of our crucial issue areas, and we are implementing initiatives such as introducing renewable energy at each of our locations and reducing CO<sub>2</sub> emissions associated with procurement and the operation of our products.

The Daifuku Group will contribute to the creation of a sustainable society by meeting the expectations of society with innovative technologies and optimal best-practice solutions while minimizing burdens on people and the environment.

- \*1 The Science Based Targets initiative (SBTi) is a collaboration between CDP, the United Nations Global Compact, World Resources Institute (WRI) and the World Wide Fund for Nature (WWF). Approval is awarded to companies that are recognized as having set science-based targets in alignment with the criteria established by the Paris Agreement.
- \*2 Scope 3 Category 1 and Category 11 combined target.
