

# Our Business

**Consolidated Sales  
by Business (FY2013)**

## Manufacturing and Distribution Systems

### FA&DA

Factory & Distribution  
Automation

Provides systems to wide-ranging sectors, including distributors and manufacturers. This business operates mainly in Japan but is focusing on needs for logistics systems along with the economic growth in Asia. Sales were also enhanced in North America through M&A.

## Cleanroom Production Line Systems

### eFA

e-Factory Automation

Provides systems to the semiconductor and flat-panel display factories. More than 90% of sales are recorded outside of Japan, including Asia and North America. In semiconductors, firm sales of products, uniquely developed to accommodate the increase in semiconductor miniaturization needs, contribute to earnings.

## Automobile Production Line Systems

### AFA

Automotive Factory Automation

Provides systems for automobile production processes worldwide, mainly for Japanese, Detroit's Three, Chinese and South Korean automakers. In particular, sales of the service business, including upgrades of the existing factories, are strong. The system conveys car bodies between each assembly process at automobile factories.

## Airport Baggage Handling Systems

### ABH

Provides systems for airports, from check-in counters for outbound flights to baggage claim areas for inbound flights. This business responds to demand for building new airports in emerging countries, as well as upgrades, services, and operations for airport facilities in the West.

## Lifestyle Products

### LSP

Provides mainly car wash machines to gas stations and automobile dealers. With production in Japan, South Korea, and China, this business boasts top shares in the Japan and South Korea markets. The business enhances eco-friendly functions, including saving water and using plant-based liquid detergents.

## Electronics

### Contec

Provides high-end industrial personal computers, controllers used in medical devices, computers built in digital signage, and measuring/control systems for mega solar facilities through Daifuku's subsidiary Contec Co., Ltd. Contec is strengthening its business globally, mainly through M&A in North America.
