

M300-TT

Tunnel/Tugger
4,500 Lbs Max Towing Capacity

The Model M300-TT is part of the top-selling family of AGVs offering ultimate flexibility, reliability and scalability at an affordable price.

FEATURES

Low Profile: Designed to “tunnel” under mobile racks and trailers to tow them from underneath. This keeps the footprint of the AGV with trailer to a minimum.

Safe: The M300-TT offers a 16-pattern laser to detect obstructions and personnel.

Affordable: Many applications can demonstrate Return on Investment in three months or less.

Simple: CartTools™ and AGV Tools software provide a user-friendly interface to implement/make changes.

Industrial: Steel construction with powder coat and industrial enamel paint.

Integration: Can integrate with Plant Control Systems via Wi-fi communications and our System Automation Manager™ (SAM) software providing traffic control.

NAVIGATION AND GUIDANCE OPTIONS

Natural Feature Navigation (NFN): Environmental feature data is collected by on-vehicle sensors and used by the vehicle computer to determine location.

Inertial Navigation: Odometry data and in-floor waypoints are used by the vehicle computer to determine location.

Magnetic Tape/Bar Guidance: Magnetic path is followed using sensors.

NAVIGATION ENHANCEMENTS

Enhanced Navigation: Additional sensors can be added to augment the vehicle's navigation technology.

Co-Navigation Technology: Multiple navigation packages may be used on a vehicle in challenging environments.

CARTTOOLS SOFTWARE

Simple, standardized toolbox of commands that make configuration a snap.

Pendant Control – When manual movement is required, it's as simple as driving the AGV where it needs to go.

Reverse Magnetic Tape Guidance – By just adding another guidance sensor and laser bumper, the M300-TT can act as a shuttle cart.

SmartSteer – CartTools commanding of the AGV to intentionally leave the magnetic path. It allows maneuvers like pivot turns and ignoring floor problems when in full automatic operation.
