Automotive Main Office/Plant

Intralogistics N.A. Works

Intralogistics Innovation Center

Airport & AGV Innovation Center

Cleanroom Innovation Center

Daifuku North America consists of subsidiaries blending their expertise to create material handling solutions for virtually every industry.

Their core business expertise spans airports, automotive, cleanrooms, electronics*, and intralogistics across North America.

The combined earnings of Daifuku North America of over US\$ 1.3 billion, and over 4,500 dedicated employees, gives them significant resources to support, expand, and innovate an extensive product line.

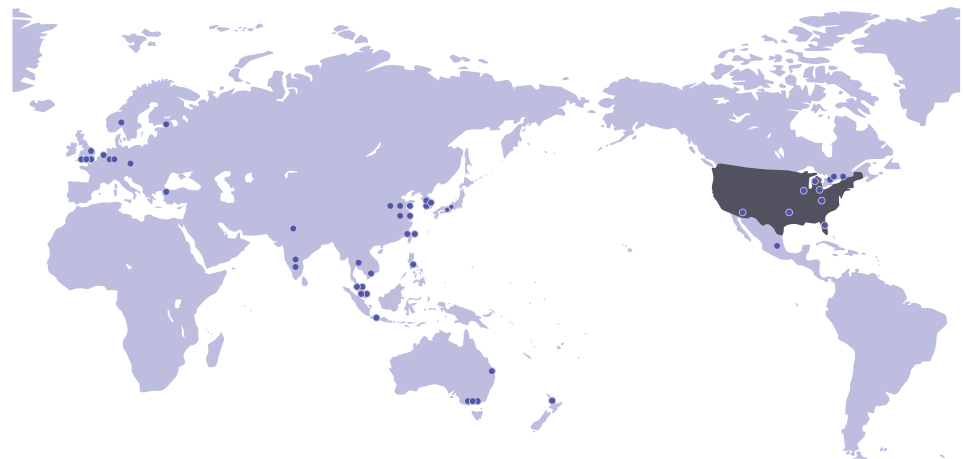

With a history spanning back to 1919, their innovative, versatile designs coupled with solid engineering has earned a reputation for unparalleled product quality, reliability, and durability, regardless of the rugged environment in which they're installed.

Their constant development is on display in three innovation centers in Novi, MI; Bolingbrook, IL; and Hillsboro, OR.

The Novi center focuses on airport and smart handling technologies, including automatic guided vehicles. Bolingbrook's location showcases intralogistic equipment for large warehouses, distribution centers and eCommerce operations. The Hillsboro site displays a wide range of solutions for semiconductor, flat panel manufacture and cleanroom applications.

Daifuku North America is part of the Daifuku Group, headed by Daifuku Co., Ltd. in Japan. The Group operates in 25 countries and regions. Daifuku has been recognized by *Modern Materials Handling* magazine as the largest material handling company in the world by sales since 2014.

Northern Michigan Manufacturing Facility

AIRPORT

**DAIFUKU AIRPORT AMERICA
DAIFUKU SERVICES AMERICA**

Our line of airport products and services span the gamut from baggage drop at check-in through baggage pick-up at the carousel and maintenance of ground support equipment, baggage handling systems and passenger boarding bridges.

Baggage Handling Systems

Mobile Inspection Tables (MIT) for Security Screening Processes

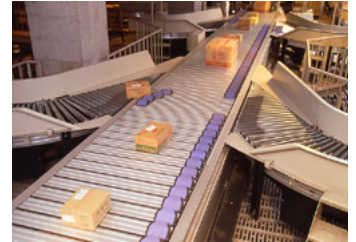

INTRALOGISTICS

**DAIFUKU INTRALOGISTICS AMERICA
DAIFUKU AIRPORT AMERICA
DAIFUKU SERVICES AMERICA**

Our robust conveyor, sortation, automated storage, robotics, and selection systems along with resident maintenance programs streamline product transportation throughout manufacturing facilities, distribution centers and eCommerce sites of all sizes.

Integrated Conveyors and AS/RS

DAIFUKU NORTH AMERICA SUBSIDIARY TIMELINE

Airport

Intralogistics

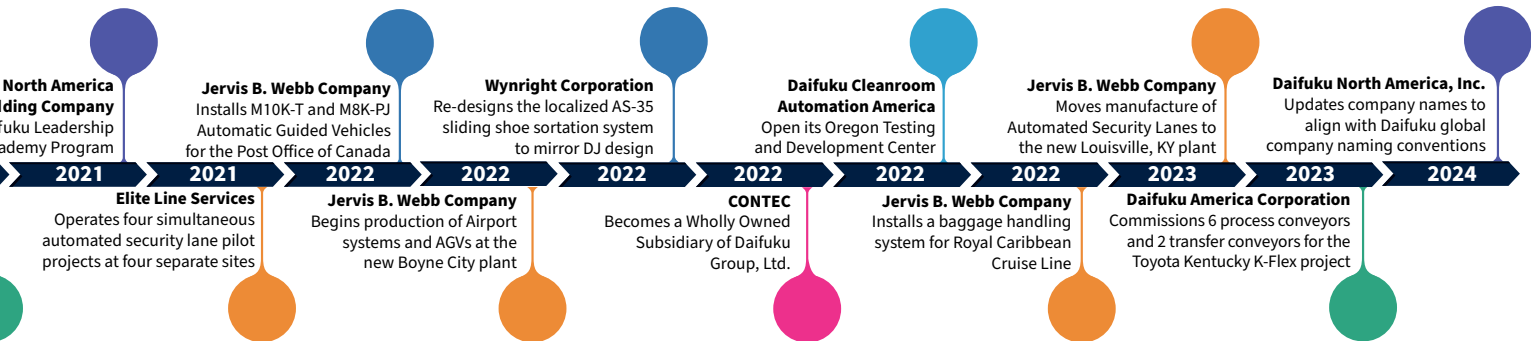

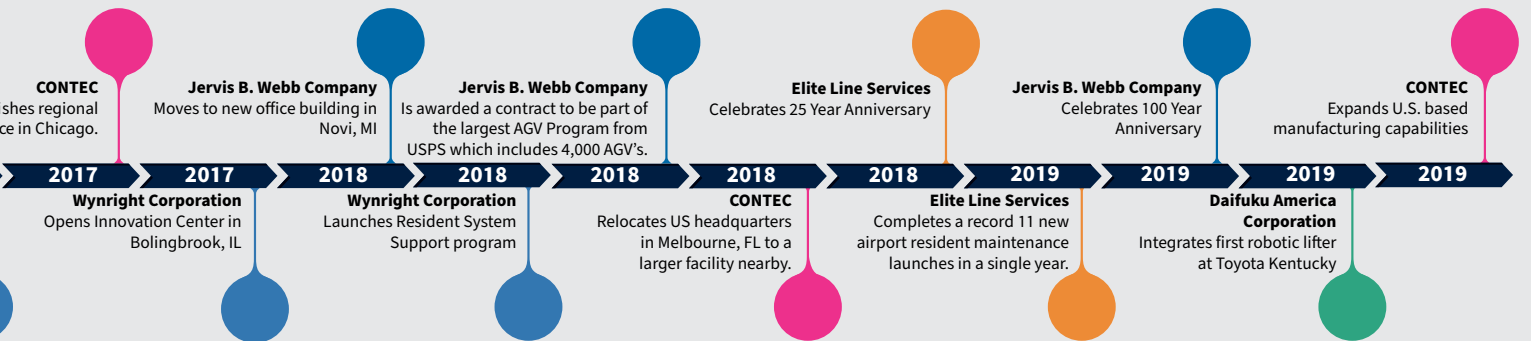

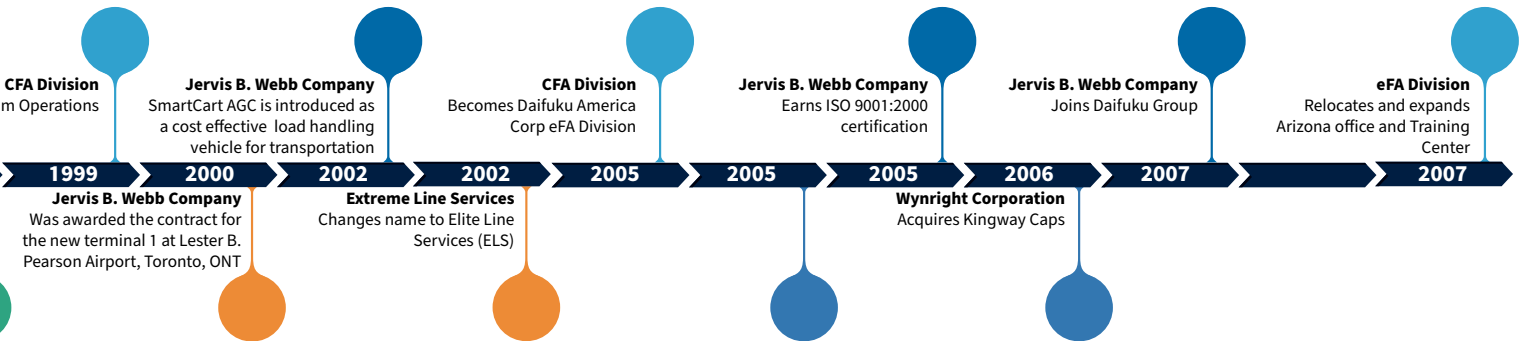

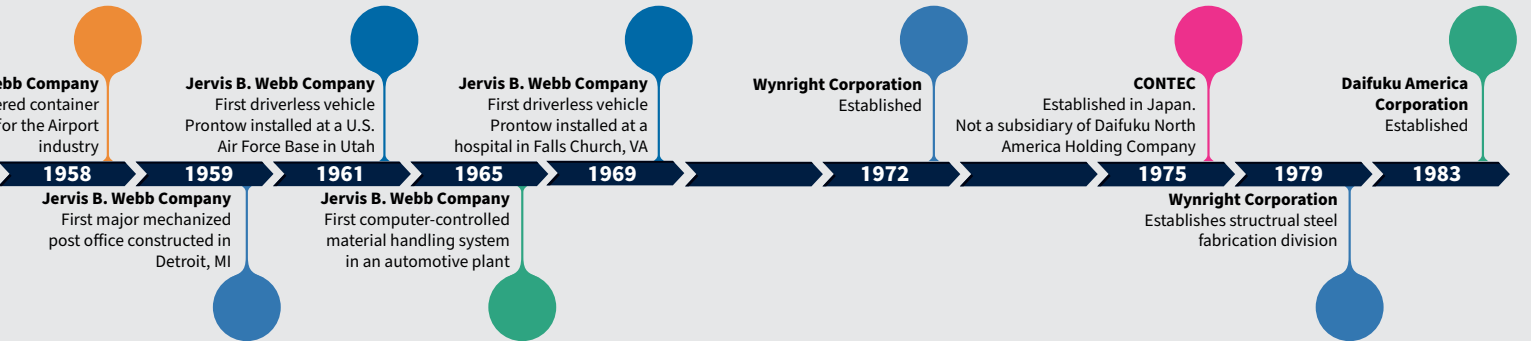

Automotive

Cleanroom

Electronics

FY2017

- The new intralogistics Innovation Center in Bolingbrook, IL opens to showcase the vast array of material handling solutions and equipment as well as for testing and design purposes. The facility brings together a multitude of Wynright/Daifuku/Webb materials handling technologies and solutions under one roof.
- The automotive group helps Honda increase output at its Swindon, UK automotive manufacturing plant by 30%.
- Contec Americas opens a new Chicago sales office and joins the Control System Integrators Association (CSIA) in response to its growth in the U.S. industrial market. The newly remodeled facility features a product showroom, conference space, private offices and an engineering lab.

FY2018

- Jervis Webb was awarded a contract to be part of the largest AGV Program from USPS which includes 4,000 AGV's. The order is a combination of pallet jack and tugger vehicles.
- A new Resident System Support program is launched by the intralogistics group to better assist its client base with maintenance and support issues. The program dedicates its own employees within their clients facilities to maintain and support their client's system.
- The automotive group develops and installs a bogey trolley in a GM paint shop.
- Contec Americas relocates its U.S. headquarters to a manufacturing and integration facility in Melbourne, Florida, nearly doubling its production capacity. The facility features factory automation, proprietary production control and traceability systems. A visitor showroom displays market-specific custom solutions.

FY2019

- The Daifuku Intralogistics North America Works in Hobart, IN. is opened. Expanding its U.S. manufacturing capabilities with a new 300,400 square foot manufacturing facility.
- The largest single automotive materials handling order is received from Fiat-Chrysler.
- The intralogistics group installs its first Daifuku Shuttle in North America. Daifuku's Shuttle Rack M is a fast, high throughput vehicle-type AS/RS designed to provide dense storage and is ideal for load sequencing.
- Jervis B. Webb Company celebrates its 100th Anniversary.
- The automotive group receives ISO 45001 Certification, registering it as a company that puts the utmost importance on the Health and Safety of its workers.
- The airport group completes record 11 new airport resident maintenance launches in a single year.
- Contec Americas expands its U.S.-based manufacturing capabilities with new, modular clean room for display integration.

FY2020

- The largest single airport project from Port of Seattle for their phase 2 project is received.
- Daifuku's updated sliding shoe sortation system is localized in the U.S. The updated AS-35 sortation system provides increased rate, improved divert technology and enhanced noise reduction.
- Daifuku's Goods-to-Person fulfillment station is localized by the intralogistics group. The newly developed system is assembled in its Arlington, TX manufacturing facility.
- A new Innovation and Training center is opened in Novi, MI.
- The automotive group absorbs Webb Canada, Webb UK, and ForgePro, expanding its scope to a more global scale for the automotive industry.
- A new cleanroom manufacturing, testing and development center opens in Oregon.
- Contec Americas launches an e-commerce website for U.S. customers, making it even easier to do business.

FY2021

- Daifuku Airport Technologies awarded a \$42.4 million project at George Bush Intercontinental /Houston Airport for Terminal D and E in addition to an on-going \$37 million project at Terminal A.
- Daifuku Intralogistics North America Works Installs third automated laser cutter and a PythonX robotic fabrication system to keep up with increased order volume.
- Ground is broken for the new 210,000 sq ft Boyne City manufacturing plant. The new facility will combine manufacturing from Harbor Springs, Petoskey, and the current Boyne City plants all under one roof, with room for expansion.
- The manufacture of the Unibilt enclosed track conveyor product line is transferred to the Reynoldsburg, OH facility.
- ELS operates four Scarabee automated security lane pilot projects at four different airports simultaneously. Expanding ELS' portfolio of offerings to Airport customers.

FY2022

- The new 235,000 sq ft Daifuku Northern Michigan Manufacturing Facility opens in Boyne City, Michigan. Consolidating all Northern Michigan manufacturing under one roof.
- Contec Americas becomes a wholly owned subsidiary of Daifuku.
- Wynright installed their 200th high-speed sliding shoe sorter
- Airport Technologies begins manufacturing Scarabee security lanes in Boyne City
- The Daifuku Intralogistics North America Works in Hobart, IN obtains ISO 9001:2015 certification.
- Wynright virtual training session sees record attendance.

Our parent company, Daifuku Co., Ltd., is a comprehensive manufacturer and integrator of material handling systems. It has grown to over 13,000 employees worldwide with sales in excess of US\$ 4.5 billion.

- Daifuku is the largest material handling system supplier in the world by sales
- Established: May 20, 1937
- Paid-in capital: 31,865.3 million yen (as of March 31, 2023)
- Representative: Hiroshi Geshiro, President and CEO
- Employees: 13,020 (consolidated, as of March 31, 2023)
- Consolidated net sales: 601,922 million yen (FY 2022)
- Operating income: 58.8 billion yen

Daifuku is in the business of consulting, engineering, design, manufacture, installation, and after-sales services for logistics systems and material handling equipment. A wide range of products including conveying systems; storage systems; sorting/picking systems; control systems and material handling tools are available to handle any material handling system requirement. We offer best solutions that satisfy customers around the world, helping to increase their competitive advantage.
