

DAIFUKU

Trolley Remanufacturing Program

SAVE UP TO 60% ON TROLLEY REPLACEMENT COSTS

Choose the remanufactured trolley program that meets your needs.

Batch Replacement:
Replace 25% of your system and begin the replacement process.

Individual Replacement:
Replace trolleys as needed.

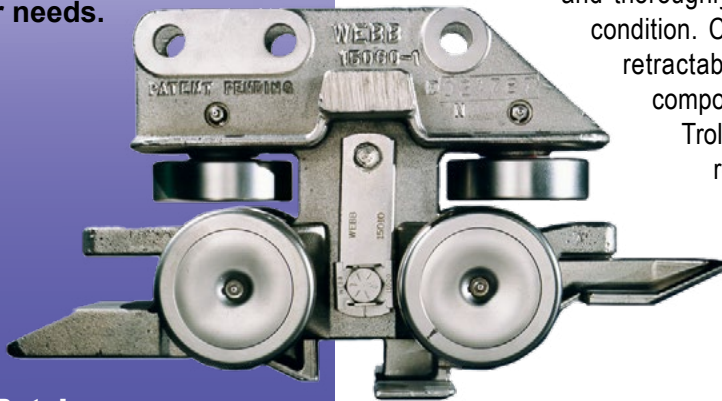

Shutdown and Change Over:
Completely remove and replace all free trolleys.

Technical System Support

Daifuku provides complete system evaluation, full service technical analysis, conveyor engineering and manufacturing expertise for comprehensive material handling solutions.

Restore your free trolleys to *like new condition* for about half the cost of new free trolleys, and dramatically improve your total conveyor system performance at the same time!

Our skilled technicians will disassemble, degrease, clean and thoroughly inspect your trolleys to determine their condition. Component parts, except cast bodies and retractable dogs, are replaced with *new* Daifuku components, ensuring exceptional performance. Trolleys are then lubricated and are ready for re-installation on your conveyor system.

Inverted Free Trolleys

Overhead Free Trolleys
