

Daifuku Environmental Vision 2020

Contribute to our customers, society, and the conservation of the global environment

We will continue to be environmentally aware in every business activity and contribute to our customers, society, and the conservation of the global environment by consistently developing and providing material handling systems with low environmental impact.

1. Promote environmentally friendly activities in business operations

- Reducing CO₂ emission from our business activities
- Taking steps to save energy and resources, introduce renewable energy, preserve biodiversity, reduce the environmental impact, and harmonize with communities

2. Increase the number of environmentally friendly products and services

- Developing and supplying environmentally friendly products and services that comply with our environmental standards
- Helping our customers reduce CO₂ emissions through our environmentally friendly products and services

3. Enhance the foundations for environmental management

- Expanding environmental education and training to increase awareness across the Daifuku Group
- Building a global management framework for the Group's environmental contribution

Targets for 2020

Theme		2020 Target		Scope
Promoting environmental consciousness in business activities	Preventing global warming (lowering CO ₂ emission)	CO ₂ emission Factories and offices (compared with FY2005 levels)	Decrease by 41% or more	Japan
		CO ₂ emission Factories and offices (Per unit of net sales compared with levels in FY2005)	72% or less	
		CO ₂ emission Product shipment (Per unit of net sales compared with levels in FY2005)	78% or less	
	Resource saving	Waste generated (Per unit of net sales compared with levels in FY2005)	72% or less	Japan
		Recycling rate	99% or more	
		Water usage (Per unit of net sales compared with levels in FY2005)	57% or less	
	Preserving biodiversity	Continue biodiversity preservation with Daifuku unique projects		Japan
	Green procurement	Continue decreasing substances of concern throughout the supply chain		Japan
		Set key indicators and targets		Non-Japan affiliates
	Expand eco-friendly products and services		Daifuku Eco-Product certification	63 or more certified products
		Contribution to reduced CO ₂ emission	100,000 tons or more	
Enhance environmental management	Environmental education	Foster eco-awareness with the expanded use of the Eco-Action program		Global
	Environmental management framework	Set up and advance an environmental management framework		Global
