**Subject: CCU-I Board – End of Life**

To Whom This May Concern –

Due to reduced demand, parts obsolescence, increased production costs and increased supply chain lead times, Jervis B. Webb is immediately discontinuing the CCU-I controller board.

This includes board part numbers: 1093238, 1092274, 1084181, 1081777

Understanding that these boards are critical to the infrastructure of our customers, we are offering the opportunity to participate in a last time buy of this product.

All orders received from now until March 1, 2023, will be included in this final batch buy of boards. Price and lead time will be determined upon order and conveyed to all participants. The current list price is \$ 5,778.00 each.

Following this last time buy, Webb will not maintain any stock of this product.

For inquiries about participating in the last time buy, please contact us at [parts@jerviswebb.com](mailto:parts@jerviswebb.com).

Most systems can seamlessly integrate our newer CCU-II generation SmartCart AGVs with a CCU-I based fleet. We would be happy to discuss these possibilities with you - please contact us at [webbservice@jerviswebb.com](mailto:webbservice@jerviswebb.com).

We plan to continue to perform repairs for the foreseeable future, however we are unable to predict the availability of replacement parts.

Thank you for being a Jervis Webb customer, and we look forward to working with you in the future.

Sincerely,

Deanna Synowiec | Customer Service Manager
